(54) Title: **CATHETER LOOP MANAGER**

(57) Abstract: A catheter loop manager apparatus which controls the slack portion of a catheter located adjacent to an implanted pump and prevents fibrotic encapsulation of the slack catheter portion. The catheter loop manager comprises a retainer element configured to associate with an implantable pump and to releasibly hold or retain a loop or section of catheter adjacent to the pump. A pull tool is used to releasibly engage a catheter section and pull the catheter section into a loop within a retention channel in the retainer element.
